SUMMARY

Computer Science & Engineering undergraduate with hands-on experience building full-stack and command-line applications. Proven problem-solving skills demonstrated through technical hackathons and academic coursework in DSA and DBMS.

EDUCATION

B.E. Computer Science and Engineering (SGPA: 8.17)

Muffakham Jah College of Engineering and Technology (MJCET) • Hyderabad, Telangana | *Expected 06/2028*

- *Core Coursework:* Data Structures & Algorithms, OOP, DBMS, and Operating Systems.

SKILLS

- **Languages:** Python, Java, C, C++, SQL, JavaScript
- **Web Technologies:** HTML5, CSS3
- **Databases & Tools:** PostgreSQL, SQLite, Git, GitHub, Command-Line Interface (CLI)
- **Core CS Fundamentals:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks.

EXPERIENCE

Technical Execom Member

IEEE Sensors Council MJCET • Hyderabad, Telangana | 10/2025 - 05/2026

- Utilized terminal environments to study core microcontroller architectures; mentored and guided **3+ student teams** through complex hardware-software integration concepts.

CERTIFICATIONS

- Python & SQL (HackerRank), Data Analytics Job Simulation (Deloitte), Build Week: DSA & Cyber Security (GDGC x Horizon).

HACKATHONS

Datanyx 2025 Hackathon | AI OMR Sheet Corrector

- Co-developed an automated bubble-sheet grading platform using Python and OpenCV; implemented computer vision algorithms achieving **98%+ grading accuracy**, successfully eliminating manual evaluation errors.

Women Ideathon 1.0 (CBIT)

- Architected a normalized relational database framework using SQL for 'SkinSync' to track **100+ hormone-disrupting components** and calculate real-time product safety scores.

PROJECTS

Score Ranker Web Application

- Developed a dynamic leaderboard web application using SQLite for persistent data storage; optimized query execution to reduce latency by **15%** for seamless, simultaneous score updates.

Secure User Authentication System

- Engineered a secure terminal-based login system in C using custom data masking protocols, mitigating credential visibility threats by **100%** during terminal inputs.

Currency Converter & Travel Budgeter

- Designed a modular Java application automating expense tracking across **5+ global currencies** using robust Object-Oriented design patterns (OOP) to handle multi-currency arrays.
